RadiantOne CFS v3.16.6
Release Notes

July 28, 2023

These release notes contain important information about features, improvements, and bug fixes, for RadiantOne CFS v3.16.6.

These release notes contain the following sections:

[Improvements](#)

[Bug Fixes](#)

[How to Report Problems and Provide Feedback](#)

Improvements

- [VSTS45409]: Change Log type to debug for the specific exception httpException with not found action on controller that was causing log pollution for the CFS logs when using security scanning tools.
- [VSTS45411]: Updated the New-IdpRtc powershell CFS cmdlet to reference all the possible properties when configuring a new RTC from script. Also updated the similar powershell CFS cmdlet New-IdpTrusted.

Bug Fixes

- [VSTS45558]: Fixed an issue with the Name Id Format field in saml2 applications mappings where it would only show 1 value (emailaddress) instead of the list of possible values.

How to Report Problems and Provide Feedback

Feedback and problems can be reported from the Support Center/Knowledge Base accessible from: https://support.radiantlogic.com

If you do not have a user ID and password to access the site, please contact: support@radiantlogic.com
